

15648. COMPARATIVE COGNITION

Profesores/as: *James Byron Nelson* (Grupo 01, inglés)

Código: 15648

Asignatura optativa: Comparative Cognition

Curso: indiferente

Segundo cuatrimestre

Créditos totales: 6 **Créditos teóricos:** 4 **Créditos prácticos:** 2

OBJETIVOS GENERALES

The course will provide the student with an introduction to comparative psychology. Students will learn basic methodologies used to study cognition in humans and animals and the resulting facts. Throughout the course the relevance of the material to modern psychology will be stressed.

TEMARIO

PARTE TEÓRICA

- 1. Animal Cognition**
- 2. Representation of Stimuli**
- 3. Memory**
- 4. Learning**
- 5. Attention**
- 6. Problem solving and reasoning**
- 7. Communication and language**

PARTE PRÁCTICA

Students will design and participate in experiments on learning in human subjects and write reports which discuss how the methodology measured an underlying cognitive skill. As a final project, the student will create a new task or method through which to study cognition
