	<p>Philosophy: We believe in harmony, beauty, timelessness, honesty and enthusiasm. We design with care and attention to the end-users, the human and non-human actors, in every project. We are passionate about creating spaces that positively affect people's lives. IMO is an architecture and design office with a vision for creating and Inspiring the World.</p> <p>Part of IMO's curriculum is the co-authorship of the 1st Prize winning design to build the Kaohsiung Maritime Culture and Popular Music Center, the 1st Prize to build the Xiafu Activity Centre and the 1st Prize to build the Taipei Meteorological Station. Other notable awards include FIABCI Taiwan Real estate Excellence Award,, Novum Design Award, New Taipei City Urban Design Award, Taiwan's Golden Pin Design Award, Architecture A+ Awards Jury Winner, APR Architecture and Design First Prize Award and the APR Global Future Design Award.</p> <p>We have been delighted to work with some outstanding clients such as: AECOM, Utzon Center, Endesa, Sacyr, Comune di Firenze, Government of Kaohsiung, Government of New Taipei City, City of Seville, La Casa Encendida, Ile De France, Seville University, Ferrán and Albert Adria.</p> <p>IMO has also contributed in teaching at Tamkang University, Tunghai University, COAM (Official College of Architects in Madrid) and lectured in Taiwan Technology University, Taiwan Culture University; in Santo Domingo (Dominica) at the Universidad Iberoamericana; in Spain at ETSAM, ETSASS, UEM; and in Japan at Kyoto Seika University, Wakaiyama University and Sagano University.</p>
<p>ACTIVIDAD PRINCIPAL</p>	<p>Architecture and Interior Design</p>
<p>TAMAÑO DE LA EMPRESA (EMPLEADOS)</p>	<p>In the IMO Taipei office Currently are working 6 people.</p>
<p>NUMERO DE PERSONAS EN EL DEPARTAMENTO DONDE TRABAJARÁ EL BECARIO</p>	<p>6</p>
<p>TIPO DE PROYECTOS</p>	<p>Architecture and Interior Design</p> <p>The projects that the IMO office gets involved in are Residential (private villas), Interior Design (apartments), Façade Design, Educational and Public Government Projects.</p> <p>Xiafu Activity Center: The Xiafu Activity-Center is located directly adjacent the Hongfu-Gong Temple in, a symbol of Taiwan's rich and ancient cultural past. The project is an example of how architecture can be an important multi-generational intersection between the custodians of Taiwanese culture and the youth of the next generation, serving as a medium where culture can be interpreted, transferred and enjoyed. Xiafu demonstrates that architecture can fulfill more than just a utilitarian function, it can enhance and contribute to the positive development of a unique cultural identity and the subsequent vitally important unique perspectives that it produces.</p>

	<p>Taipei Weather Station This project is located in a natural environment: wet grass, sound of birds, the smell of the morning fog, old leafy trees... From the very beginning it was clear that the main challenge of the site was how to integrate a Weather Station in such a magnificent environment. This project achieved that dividing the Weather Station into 3 buildings and using an undulating roof to help those buildings establish a gentle relationship with the ground.</p> <p>Sanchong Façade One of the elements that we have noticed in Taiwanese residential buildings is that there is a big energy consumption due to a massive use of air conditioning throughout the year. This façade design for a residential building of 100 m. high addressed these issues. After a study of temperature, relative humidity, wind speed, global horizontal illumination, sky coverage, etc. this façade scheme guarantees a 34% of air conditioning reduction throughout every year compared to the original building design given by the client. This is not only an important energy and cost saving, it also optimizes the sustainability and comfort feeling in the building.</p> <p>Hotel in Suao Suao is the gateway to the natural East side of Taiwan. It is the place where the green of nature meets the blue Pacific, where the immovable central mountain range 中央山脈 meets the unstable and changing sea, where the unfathomable jungle meets the open ocean. This project explores this duality in the people who pass by Suao, a place where we want to look to the infinity and be in our own space, observe the force of the sea and feel protected, enjoy the agitation of the ocean and experience the tranquility of nature.</p>
<p>COLABORACION EN PROGRAMAS SIMILARES A GLOBAL TRAINING</p>	<p>IMO has received interns from Escuela Técnica Superior de Arquitectura de San Sebastian (ETSASS, UPV-EHU) during years 2016,2017 and 2018. From NCKU, 國立成功大學 National Cheng Kung University in 2018 and 2021. Since 2019 IMO joined Global Training.</p>
