

PROPOSAL ENGINEER

Who is Suez?

Present on 5 continents and with more than 40,000 employees worldwide, SUEZ is an industrial services and solutions company specializing in resource protection and recovery. SUEZ offers innovative consulting solutions that include technical, economic, environmental, and social aspects for sustainable design, ensuring resource protection. Our employees contribute to the development of projects, investment optimization, and the management of complex projects.

With 160 years of experience, SUEZ has been and will continue to be a partner for municipalities and companies, helping them manage essential services such as water, waste, and air quality. Currently, SUEZ produces drinking water for more than 66 million people, recovers around 2 million tons of waste per year, and generates more than 3.1 TWh of green energy.

The offered position is for SUEZ E&C (Engineering and Construction), a transversal business of SUEZ dedicated to water treatment infrastructures (potable water plants, desalination plants, wastewater treatment plants, etc.) and waste for the international market. Its broad scope of activities covers areas of design, construction, finance, and operations, providing technical expertise in project management.
