2019/20

<b>Faculty</b>	160 - Faculty of Labour Relations and Social Work. Álava Department	<b>Cycle</b>	Not Applicable
<b>Degree</b>	GTRABA10 - Bachelor's Degree in Social Work	<b>Year</b>	First year

## COURSE

25941 - Philosophy and Social Work

**Credits, ECTS:** 6

## COURSE DESCRIPTION

The subject "Philosophy and social work" is taught within the Degree in Social Work, and belongs to Module C: "Gizarte langintzaren ardurapeko prozesuak eta arazoak / Procesos y problemas sobre los que actúa el Trabajo social". It is a first year compulsory subject (second semester), and consists of 6 ECTS credits.

Module C consists of two subjects: "Giza garapena / Desarrollo Humano" (24 ECTS), and "Egitura, desberdintasuna eta gizarte bazterketa / Estructura, desigualdad y exclusión social" (12 ECTS). It focuses on the first two courses of the degree, offering basic training to future graduates.

The subjects of this module, which mostly belong to the branch of social and legal sciences, are the following: "Filosofia eta gizarte langintza / Filosofía y trabajo social / Philosophy and social work", "Antropologia eta gizarte langintza / Antropología y trabajo social", "Gizarte langintzarako psikologia / Psicología para el trabajo social", "Gizarte langintzarako psikologia soziala / Psicología social para el trabajo social / Social psychology for social work", "Soziologia eta gizarte langintza / Sociología y trabajo social", and "Gizarte egitura eta estratifikazioa / Estructura y estratificación social". These subjects are taught with the purpose of developing contents and competences about human nature and behavior, their relation with social structures, and the difficulties and problems derived from the relationships among people in their potential environments, as with the purpose of developing the proper scientific methodology to study all that.

The module also enables the acquisition of instrumental competences (e.g., analytical and synthetical skills, oral and written communication, problem-solving abilities), personal competences (e.g., teamwork, critical reasoning) and systemic competences (e.g., autonomous learning, creativity).

The general objective of the subject "Philosophy and social work" is to contribute a theoretical and moral reflection about human nature. In this sense, the subject aims to provide the students with a series of basic knowledge and skills in relation to the critical, socio-ethical and epistemological foundations of the profession of social work. In this way, it shares with the other subjects of the module, especially with "Soziologia eta gizarte langintza / Sociología y trabajo social" and "Antropologia eta gizarte langintza / Antropología y trabajo social", an interest to reflect and shed some light on human behavior in its socio-cultural context, as well as to evaluate different strategies of the professional activity of social work on grounds of that understanding.

Anyway, the subject "Philosophy and social work" is characterized by enabling a differentiated second-order area of knowledge from which to reflexively and critically analyze the cultural and disciplinary presuppositions that inform the theories and practices sustaining the activity of social work. From this point of view, philosophical reflection applied to social work is aimed at the analysis of the most general, or basic, foundations and assumptions in which this activity is sustained. Therefore, the subject aspires to develop and promote among the students the competences to identify, interpret and apply certain ideas and conceptions about human beings and society that underlie--sometimes tacitly and, therefore, uncritically, or unreflectively--to the perspectives, decisions and practices of the social workers.

## EDUCATIONAL OBJECTIVES

The general objective of the subject "Philosophy and social work" is that the students are able to identify, elucidate, relate, compare and criticize the principles and theoretical-ideological assumptions on which the profession of social work lies. This general objective can be broken down into the following educational objectives:

- To promote among the students the ability to approach and solve, in a reasoned way, the most characteristic moral dilemmas affecting the social worker-client relationship.
- To promote among the students the ability to evaluate and compare, in a reasoned way, the existing possibilities of professional intervention based on the identification and elucidation of the main determinants of human behavior in its social environment.

## COMPETENCIES/LEARNING RESULTS FOR THE SUBJECT

- Specific competences of the subject (derived from module competences):

\* C1: to develop the capacity for critical thinking, or good argumentation, among the students. [CM07]

\* C2: to identify the basic topics of ethics and professional deontology, enhancing the social responsibility of the future social workers. [CM08]

\* C3: to understand the fundamental elements that determine human behavior in its social context, as well as the basic theoretical categories that represent them. [CM01]

\* C4: to develop the ability of students to identify their values and cognitive schemes in order to develop their future professional practice objectively and respectful of human rights. [CM07]

- Grade competences:

\* G007: to enhance the social responsibility of organizations and the professional ethics, applying quality criteria and professional supervision protocols (Transversal).

\* G010: to develop the skills necessary for professional practice, and in particular the following abilities: criticism-reflexivity, analysis, communication, relational abilities, team working and networking (and to develop them in inclusive ways regarding gender, inter-culturalism, rurality, etc.) (Transversal).

(In order to know in detail about the rest of grade competences related to CM01, CM07 and CM08, namely, G001, G003 and G004, see the "Memoria para la Solicitud de Verificación del Título Oficial - Grado en Trabajo Social" (2010), available in eGela.)

- Basic MEC competences: MEC2, MEC3 and MEC4.

(In order to know in detail about both these basic MEC competences as well as the rest of them [MEC1 and MEC5], related to G001, G003 and G004, see the "Memoria para la Solicitud de Verificación del Título Oficial - Grado en Trabajo Social" (2010), available in eGela.)

## COURSE CONTENTS, THEORETICAL & APPLIED

(According to the syllabus approved by the ANECA.)

### 1. INTRODUCTION: CONTRIBUTIONS OF PHILOSOPHY TO SOCIAL WORK

### 2. PHILOSOPHY IN THE STUDIES OF SOCIAL WORK: CRITICAL THINKING AND PROFESSIONAL ACTIVITY

- 2.1. Basic elements of argumentation
- 2.2. Argumentative fallacies

### 3. THE MORAL DIMENSION OF SCIENCE: ETHICS AND SOCIAL WORK

- 3.1. The moral (and ethical) dimension of the human being
- 3.2. Moral norms and other norms
- 3.3. Some ethical theories
  - 3.3.1. Deontological ethics
  - 3.3.2. Utilitarian ethics
  - 3.3.3. Virtue ethics
- 3.4. Principles of social work: beneficence, autonomy, justice

### 4. THE COGNITIVE ACTIVITY IN SCIENCE AND THE IDEA OF THE HUMAN BEING: EPISTEMOLOGY AND SOCIAL WORK

- 4.1. The scientific explanation of human behavior
  - 4.1.1. Causal explanation: regularities, laws and singularity
  - 4.1.2. Intentional explanation: reasons and irrationality
- 4.2. Trust and social work: knowledge, ignorance, values

## TEACHING METHODS

A- The type of methodology to be used will vary according to the number of students in class. If that number is equal to or less than 20, the method to be used will be that of Problem Based Learning (PBL)--on basis of the ERAGIN model of the UPV/EHU. According to this methodology, the following types of educational activities will be carried out:

\* Problem-solving oriented teamwork. Preparation and presentation of: report(s), poster(s), video(s).

\* Searching and reading of scientific texts (some of them will be offered by the professor), oriented to the resolution of problems. (The readings will be conducted both individually and in groups.)

\* Professional testimonies, aimed at problem-solving. Active and interactive listening of students will be promoted here.

\* Reinforcement classes by the professor.

- \* Autonomous study work by the students.

- \* Tutorials (individually and in groups).

B- In case the number of students in class is higher than 20, then the following educational activities will be carried out:

- \* Lecture classes by the professor.

- \* Reading of scientific texts (offered by the professor), aimed at deepening the issues and problems addressed in class.

- \* Professional testimony(ies), where the active and interactive listening of students will be promoted.

- \* Autonomous study work by the students.

- ## \* Tutorials.

## **TYPES OF TEACHING**

<b>Types of teaching</b>	M	S	GA	GL	GO	GCL	TA	TI	GCA
<b>Hours of face-to-face teaching</b>	45		15						
<b>Hours of student work outside the classroom</b>	67,5		22,5						

<b>Legend:</b>	M: Lecture-based	S: Seminar	GA: Applied classroom-based groups
	GL: Applied laboratory-based groups	GO: Applied computer-based groups	GCL: Applied clinical-based groups
	TA: Workshop	TI: Industrial workshop	GCA: Applied fieldwork groups

## Evaluation methods

- Continuous evaluation
  - End-of-course evaluation

## Evaluation tools and percentages of final mark

- Written test, open questions 50%
  - Other types of exercises or written control works 50%

## **ORDINARY EXAMINATION PERIOD: GUIDELINES AND OPTING OUT**

A- This subject will be evaluated by means of mixed evaluation (100% of the final grade), and through the following activities:

A.1. One or more exercises or written control works (depending on the nº of students) designed to develop the ability to identify, and argue correctly about, the main normative-evaluative and/or epistemological problems and concepts associated with the practice of social work: 50% of the final grade. [Evaluated competences: C1,2,3,4; G007, G010.]

A.2. One or more written exams (depending on the nº of students) designed to develop the same abilities pointed out in A.2: 50% of the final grade. [EC: C1,2,3,4; G007, G010.]

A.3. Final written exam: included in A.2, it will not weight more than the 50% of the final grade.

A.4. In order to pass, the number of failed activities cannot be higher than one. In the extraordinary call, only separately failed activities will have to be retaken. Both in ordinary and extraordinary calls, when the final average grade reaches (or exceeds), numerically, a pass (that is, a "5"), but there are two or more activities that have been separately failed, then the final grade will be "3.5".

A.5. In case PBL is applied, the students will have to attend all face-to-face classes to pass the subject (unless the absence is duly justified). Otherwise, class attendance will be regulated according to UPV/EHU regulations.

#### B- Final evaluation:

B.1.a. "Ikasleek eskubidea izango dute azken ebaluazio bidez ebaluatuak izateko (...). [I]kasleak etengabeko ebaluazioari uko egiten diola jasotzen duen idatzi bat aurkeztu beharko dio [...] irakasleari eta, horretarako, bederatzi asteko epea izango du lauhilekoko irakasgaien kasuan edo 18 astekoa urteko irakasgaienean, ikastegiko eskola egutegian zehaztutakoarekin bat lauhilekoa edo ikasturtea hasten denetik kontatzen hasita" (UPV/EHU regulation, art. 8.3).

B.1.b. "En todo caso el alumnado tendrá derecho a ser evaluado mediante el sistema de evaluación final (...). [E]l alumnado deberá presentar por escrito al profesorado (...) la renuncia a la evaluación continua, para lo que dispondrán de

un plazo de 9 semanas para las asignaturas cuatrimestrales y de 18 semanas para las anuales, a contar desde el comienzo del cuatrimestre o curso respectivamente, de acuerdo con el calendario académico del centro" (art. 8.3).

B.2. It will consist of a wide set of exercises and tests aimed at demonstrating all the constitutive competences of the subject (C1,2,3,4; G007, G010). The time available to complete this set of exercises and tests will be the maximum time stipulated by the official exams calendar.

#### C- Renouncement to the call:

C.1. Continuous assessment: "azken probaren pisua bada irakasgaiko kalifikazioaren %40 baino handiagoa, nahikoa izango da proba horretara ez aurkeztea azken kalifikazioa "aurkezteke" izan dadin. Aldiz, azken probaren pisua bada irakasgaiko kalifikazioaren %40 edo hori baino txikiagoa, deialdiari uko egin nahi dioten ikasleek kasuan kasuko irakasgaiaren irakaskuntza aldia bukatu baino, gutxienez, hilabete lehenago egin beharko dute eskaria. Eskari hori idatziz aurkeztu beharko zaio (...) irakasleari" (art. 12.2). Final assessment: "azterketa eguna ofizialean egin beharreko probara ez aurkezte hutsak ekarriko du automatikoki kasuan kasuko deialdiari uko egitea" (art.12.3).

C.2. Continuous assessment: "si el peso de la prueba es superior al 40% de la calificación de la asignatura, bastará con no presentarse a dicha prueba final para que la calificación final sea no presentado o no presentada. En caso contrario, si el peso de la prueba final es igual o inferior al 40% de la calificación de la asignatura, el alumnado podrá renunciar a la convocatoria en un plazo que, como mínimo, será hasta un mes antes de la fecha de finalización del período docente de la asignatura correspondiente. Esta renuncia deberá presentarse por escrito ante el profesorado (...)" (art. 12.2). Final assessment: "la no presentación a la prueba fijada en la fecha oficial de exámenes supondrá la renuncia automática a la convocatoria correspondiente" (art. 12.3).

#### D- Cheating policy:

D.1. "Ebaluazio proba batean kopiatu egin dela egiaztatuz gero, tartean sartuta dauden ikasle guztiei «suspensio» kalifikazioa jarriko zaie (...). Pertsona bat kopiatzen ari dela proban bertan egiaztatuz gero, momentuan bertan proba egiteari uzteko agindu ahal izango zaio" (art. 11.3).

D.2. "Ante la comprobación fehaciente de copia en una prueba de evaluación, ésta se calificará con la puntuación de «suspenso» a cada estudiante implicada o implicado (...). Si la comprobación se produce durante el desarrollo de la prueba, ésta se podrá interrumpir inmediatamente para la persona implicada" (art. 12.3).

#### E- This subject adheres to the UPV/EHU protocol on academic ethics and dishonest and fraudulent practices.

### **EXTRAORDINARY EXAMINATION PERIOD: GUIDELINES AND OPTING OUT**

With the exception of those who, having opted for the mixed evaluation system (see part A from the previous section), have approved some activity separately in the ordinary call, students will have to conduct in the extraordinary call all the exercises and tests considered as necessary to demonstrate the constitutive competences of the course (C1,2,3,4; G007, G010). The time available to complete this set of exercises and tests will be the maximum time stipulated by the official exams calendar.

The sections D and E presented in the previous section (dedicated to the ordinary call) are also applicable in the extraordinary call.

### **MANDATORY MATERIALS**

Materials that will be published throughout the course in the eGela virtual platform (power points, exercises, diagrams, texts, etc.), readings provided by the professor, and a notebook for each student.

#### OBSERVATIONS

- 1- The way in which the Study Guide is implemented may vary from what is stipulated according to the actual classwork and homework dynamics. This could affect the content, the competencies, the methodology or the evaluation criteria and percentages. In any case, changes will be duly communicated and justified to the students.
- 2- Changes may include, in extreme cases (i.e., where the work dynamic is notably insufficient), the total suspension of the application of the PBL methodology.
- 3- In case the number of students in class exceeded the stipulated number of 20 students not by much, the use of PBL would be considered.
- 4- The lack of orthographic and grammatical correctness as well as an inadequate writing may imply a fail.
