

BATTERY DESIGN ENGINEER

We are seeking skilled Battery Design Engineers to join our dynamic teams located in San Sebastian, Barcelona and Valladolid.

If you are a Battery Design Engineer with a passion for electric vehicle technology, hands-on experience, and a desire to contribute to the evolution of sustainable transportation, we encourage you to apply. Join us in shaping the future of sustainable mobility.

RESPONSIBILITIES:

The position is a mix of project management and design, around different parts of the powertrain, mainly on batteries, some of the principal tasks are below:

- Management of design documentation and planning of the activities.
- Deadline adjustment and follow-up of the activities.
- Suppliers/ client activities management.
- Reporting and presentation of project progress.
- Management of database of the design and 3D files.
- 3D CAD parts operation and analysis

PROFILE:

- Engineering degree + Master (will be a plus)
- Good English level.
- Knowledge of electric powertrains and batteries in particular is valuable.
- High sense of responsibility, goal-orientation and teamwork skills.
- Extra curriculum activities like Formula Student will be valuable.
- Programming or Matlab knowledge will be valuable.
- 3D SW usage like NX or SolidWorks is valuable.

Department: Powertrain Engineering

Location: Donostia-San Sebastian / Barcelona / Valladolid
